# Today's Meccano

Meccano – the great original among construction toys – gets better, more versatile every year.

With conversion kits, plus motors, gears and mechanisms, it grows into a system that's as big as your imagination.

New Multikit (see p.38) – with ready-made, rugged cab-sections, wheels and tracks – now makes Meccano more realistic than ever before.

Think it up, make it up. It's easy with Meccano.

**NEW**

# PLASTIC MECCANO

Build big models fast, then decorate them with the sticker sheet in each set.

You can also buy Conversion Sets, extra nuts and bolts and a Flexible Track Pack.

For the very young.  
 Big safe colourful  
 plastic pieces slotting  
 together to make big  
 models fast.  
 Prima—it's learning  
 while playing.

For 3 to 6 year olds.

Pocket Meccano is a complete, handy-sized  
 Meccano Set a child can carry around. And  
 inside the pack are the plans  
 for the first 25 models.

**POCKET

Meccano Multikit Crane-building Set. Complete with  $1\frac{1}{2}$  -  $4\frac{1}{2}$  volt DC electric motor, battery box and gears. Plans for your first eight cranes.

Motor. Gears. Battery Box.

Four specialised sets, each with a particular theme, bring extra realism and extra play-power to Meccano model-making.

Use Multikit on its own, or with Standard Meccano—using the ready-made sections and life-like features to add real-life style and drama to your models.

Multikit makes it a little bit special—and every bit Meccano.
